## Wenlock Water Coolers

Wenlock Water Coolers provide a constant source of refreshing water whatever your venue; whether a conferencing facility, hotel, spa, office, school or surgery. Increasingly they are also found in private homes so that family and friends can enjoy clean and safe water.

Depending on your establishment, you can select from a range of cost-effective and stylish water coolers, in either floor standing or desktop models. The water coolers have options for natural chilled, ambient and hot water all using the naturally filtered water from the Wenlock Edge. If preferred we are able to supply a full range of cost-effective mains-fed water coolers.

The coolers are installed by WRAS (Water Regulation Advisory Service) approved installers and are serviced on a quarterly basis.

The cost for installation, rental and equipment servicing can be discussed with a dedicated Sales Manager.

Clean, refreshing and delicately sweet, Wenlock Water Coolers can cater for you whatever the venue.
