

wenlock SPRING

Wenlock Spring Glass

Wenlock Spring bottled in glass is the perfect choice for fine dining restaurants, large conferencing events, or for individual consumption. The brand of water available in your venue can considerably add to the experience so it is important to make the right choice.

The spring water is naturally filtered through the rock strata of the Wenlock Edge creating a unique blend of minerals; including selenium and calcium. Wenlock Spring Still is a unique spring water bottled at source in its purest form, nothing added, nothing taken away; just as nature intended. A light touch of fizz is added to make Wenlock Spring Sparkling – and it's a Gold Award winner as judged by the British Bottlers' Institute.

The award winning glass bottle combines a classic bottle shape with a contemporary label design. The label clearly shows the provenance of Wenlock Spring through both branding and design. The bottles are made from recycled glass and all waste bottles from the site are then recycled.

Clean, refreshing and delicately sweet, Wenlock Spring can add a touch of quality, whatever the occasion.

Available Sizes:

- 330ml: the ideal size for an individual refreshing drink
- 750ml: the preferred size for use in fine dining environments
- 1 litre: selected for conferencing and events
